Task 1: Personal Portfolio Website

Task 1: Personal Portfolio Website

Student Name: Salva Akbar

Domain: Frontend Web Development

Objective

The objective of this task is to design and develop a responsive personal portfolio website using HTML, CSS, and Bootstrap.

The portfolio website showcases personal information, technical skills, projects, and contact details. The website is designed to be mobile-friendly and fully responsive, ensuring accessibility across different devices such as mobile phones, tablets, and desktops.

Tools & Technologies Used

The following technologies were used to build this project:

- HTML5 – for structuring the web pages
- CSS3 – for styling and layout
- Bootstrap 5 – for responsive design and components
- GitHub – for version control and code hosting
- GitHub Pages – for deploying the live website
- Visual Studio Code – for writing and editing code

Features of the Portfolio Website

The portfolio website includes the following features:

- Responsive layout compatible with **mobile, tablet, and desktop devices**
- Navigation bar with **smooth scrolling**
- Home section with introduction
- Skills section displaying technical skills
- Projects section showcasing sample projects
- Contact section with email information
- Clean and simple user interface

Website Sections

Home Section

The Home section introduces the developer with name and role.

Example:

Hello, I'm Salva Akbar
Web Developer | Designer | Student

Skills Section

The Skills section displays the technical skills of the developer.

Skills included:

- HTML
- CSS
- JavaScript
- Bootstrap

These skills are displayed using **responsive cards styled with CSS and Bootstrap**.

Projects Section

The Projects section displays sample projects developed by the user.

Example projects:

Project 1 – Portfolio Website
Project 2 – Todo App
Project 3 – Weather App

Each project is displayed using **Bootstrap cards**.

Contact Section

The Contact section provides contact information for communication.

Example:

Email: salvaakbar@email.com

Project Folder Structure

The project folder contains the following files:

```
portfolio-website
|
 ├── index.html
```

```
├── style.css
├── README.md
```

Important Code Snippets

Navbar Code (HTML)

```
<nav class="navbar navbar-expand-lg navbar-dark bg-dark fixed-top">
<div class="container">
<a class="navbar-brand" href="#">MyPortfolio</a>
<button class="navbar-toggler" data-bs-toggle="collapse" data-bs-target="#menu">
<span class="navbar-toggler-icon"></span>
</button>
<div class="collapse navbar-collapse" id="menu">
<ul class="navbar-nav ms-auto">
<li class="nav-item">
<a class="nav-link" href="#home">Home</a>
</li>
<li class="nav-item">
<a class="nav-link" href="#skills">Skills</a>
</li>
<li class="nav-item">
<a class="nav-link" href="#projects">Projects</a>
</li>
<li class="nav-item">
<a class="nav-link" href="#contact">Contact</a>
</li>
</ul>
</div>
</div>
</nav>
```

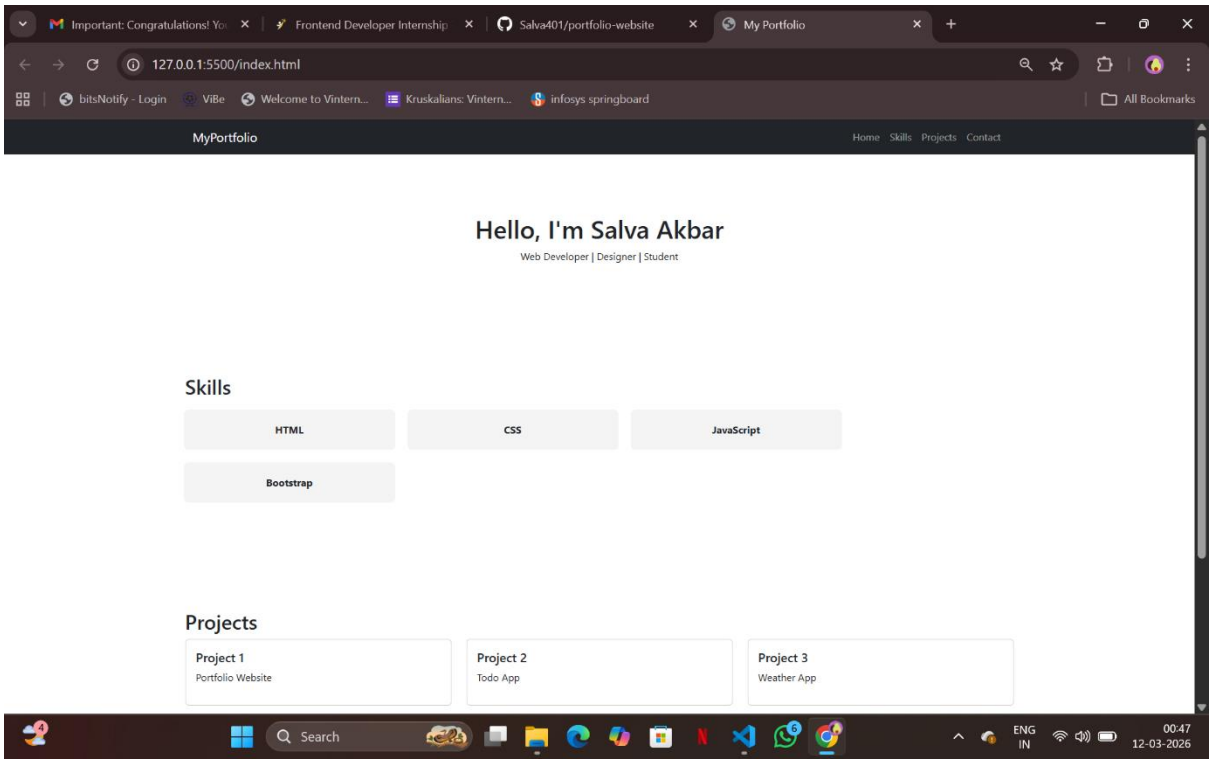
Skills Section (HTML)

```
<section id="skills" class="container section">
<h2>Skills</h2>
<div class="row">
<div class="col-md-3 skill">HTML</div>
<div class="col-md-3 skill">CSS</div>
<div class="col-md-3 skill">JavaScript</div>
<div class="col-md-3 skill">Bootstrap</div>
</div>
</section>
```

CSS Styling:

```
body{
scroll-behavior:smooth;
padding-top:70px;
}
.section{
padding:80px 0;
}
.skill{
background:#f4f4f4;
margin:10px;
padding:20px;
text-align:center;
border-radius:8px;
font-weight:bold;
}
```

Screenshots



1. It includes: Homepage
2. Skills Section
3. Projects Section
4. Mobile Responsive View

All the above are included in output

GitHub Repository Link

Source code is available at: https://github.com/Salva401/Internspark-frontend-development-tasks/tree/main/Task1-Portfolio-Website

Live Website Link

The portfolio website is deployed using GitHub Pages.

Live website: https://salva401.github.io/Internspark-frontend-development-tasks/Task1-Portfolio-Website/

Conclusion

This project demonstrates the ability to build a **responsive portfolio website using HTML, CSS, and Bootstrap**.

The website includes multiple sections, smooth navigation, and responsive layout. The project also demonstrates knowledge of **GitHub for version control and GitHub Pages for deployment**.
